

GOFFREY MBAI

Fullstack Software Engineer

+254710984312 • jeffkinuthia254@gmail.com • <https://jeffmbai.netlify.app/> • Kenya

Summary

Full-Stack Software Engineer with 4+ years of professional experience in software development, specializing in React, React Native, TypeScript, C#, .NET, Flask, FastAPI, Azure, Docker and Kubernetes. Experienced in developing responsive web applications, cross-platform mobile applications, RESTful APIs, microservices, and cloud-based solutions. Strong expertise in software architecture, system integration, database design, CI/CD implementation and Agile development methodologies. Proven track record of delivering scalable, secure and maintainable applications while collaborating with stakeholders and development teams.

Experience

Turing

Software Developer

Remote

08/2025 - Present

- Collaborated with cross-functional teams to design, develop, and deploy web application features, ensuring alignment with business and user requirements.
- Built and maintained frontend and backend functionality for containerized web applications used in AI agent workflows.
- Developed reusable UI components and optimized application performance through efficient architectures, caching strategies and responsive design.
- Conducted UI/UX evaluations to meet quality benchmarks and accessibility standards.
- Validated application functionality through API, integration and end-to-end testing, ensuring reliability and accuracy.
- Integrated third-party APIs for enhanced functionality and seamless data exchange between systems.
- Delivered high-quality documentation detailing component usage, workflows and troubleshooting procedures.

BusinessCloud Technologies

Software Engineer

Nairobi

12/2023 - 09/2025

- Developed and maintained full-stack applications using C#, .NET, and React, ensuring seamless integration between front-end and back-end components
- Implemented RESTful APIs and web services to enhance application functionality and performance
- Utilized DevOps practices, including CI/CD pipelines, to automate deployment processes and improve development workflows
- Developed mobile applications using React Native, ensuring cross-platform compatibility and responsive user interfaces
- Integrated Microsoft Identity for secure authentication and authorization, enhancing application security and user management

Siweb Technologies

Software Engineer

Nairobi

10/2022 - 11/2023

- Designed and developed full-stack web applications using Laravel, CodeIgniter, Flask, and React
- Implemented RESTful APIs and integrated them with front-end frameworks to ensure seamless user experiences
- Created responsive and dynamic user interfaces using React, ensuring cross-browser compatibility and optimizing performance
- Developed and maintained server-side logic, database schemas, and complex queries using Laravel, CodeIgniter, and Flask
- Utilized Git for version control, managing code repositories and collaborating with team members on development project

Iosoft technologies

Junior Software Engineer

Nairobi

01/2022 - 09/2022

- Development and maintenance of web applications using PHP, CodeIgniter, Flask, React and MSSQL Server, ensuring seamless functionality across front-end and back-end systems
- Utilization of version control systems such as git to manage codebase and facilitate team collaboration
- Collaboration with cross-functional teams to gather requirements, analyze user needs, and translate them into technical specifications
- Customization and configuration of CMS platforms like WordPress to meet client requirements and project objectives

Skills

React • React Native • TypeScript • Tailwind • Flask • C# • Net • Fast API • Docker • Kubernetes • Azure • Firebase • Next JS • PostgreSQL, MySQL, SQLAlchemy

Education

Moi University

Bachelor of Science, Informatics

React Native Application for SAAS for project monitoring and evaluation

- Increased system absorption by 90%, streamlined task allocation and follow ups with geotagging and offline capabilities

Projects

iBusiness	Location
04/2024	
iBusiness is mobile application for the accounting saas to enhance ease of use	
Leveraged on React Native, Microsoft Identity, Expo and Firebase to integrate the key accounting saas processes. The app was integrated with offline awareness to enable all time access	
TopMarine	Location
06/2024	
Top Marine is mobile app developed using React Native, C#, Expo and Microsoft identity, It is a shipping logistics tracking application where shippers can track their shipment logistics from where they're boarded to offloading	
iComms	Location
08/2024	
iComms is an mobile application geared towards enhancing business and county administrative operations for key business and government agencies
